H1211 Antistatic Agent

Conducting Polymers

Physical Properties

Appearance	Blue liquid
Conducting Material	Polymer conductive compounds
PH Value	7-8
Dissolvability	Ethanol, water

Coating Effect

Resistance:105-7Ω/sq

Anti-static effect doesn't affect by temperature and humidity, resistivity doesn't rise up obviously under low humidity. Under normal circumstances, anti-static effect can keep more than 5 years if there is no damage on its surface. Coating is colorless and transparent in regular use.

Application

for PET Film anti-static purpose

Coating method

Roller coating or spraying
